Consultation

A draft stakeholder consultation document was prepared to be reviewed by the Executive Committee and distributed to IDI/ATRC stakeholder communities for input into the governance, reporting and success criteria for the EDU:C.

Events

The IDI/ATRC hosted an international Open Source Accessibility Forum in conjunction with Toronto Open Source Week. Accessibility experts from the around the world and open source community leaders discussed strategies to address 5 priority areas in open source accessibility.

Select Research Highlights

The IDI/ATRC has developed "tagin!" an open-source WiFi-based indoor/outdoor POI tagging service that will allow private and public location-based products and services to enter still untapped indoor spaces, while providing the redundancy required to bridge with current, primarily outdoors, GPS-based products and services, seamlessly. The Fluid Engage project has released the Engage 0.1, the first alpha of a user experience authoring toolkit for museums and galleries. [http://fluidengage.org/](http://fluidengage.org/)

ATutor 1.6.4 Beta was released with complete common cartridge authoring, exporting, and importing, as well as AccessForAll. This will enable a broad research project evaluating the efficacy of AccessForAll through the training of up to 65,000 Ontario Public Service workers. [http://atutor.ca](http://atutor.ca)

A stabilization draft of the W3C Authoring Tool Accessibility Guidelines was released and is available for public review. This is the last stage before last call. These guidelines will be integrated into legislation in a number of jurisdictions worldwide. [http://www.w3.org/WAI/intro/atag.php](http://www.w3.org/WAI/intro/atag.php)
