Critical Histories of Information and Communication Technologies

Rationale: [State the reason for creating the course, changing its weight, changing its grading scheme, or introducing a new mode of delivery; also explain the place of the course in your program.]
This has been taught as a special topics course for three terms. We are now making it permanent. It is a required course in the Critical Information Policy Studies concentration, and a suggested elective for the Communication and Technology, Information Systems & Design, and Knowledge Media Design concentrations.

Course Description: [Approx. 100-150 words; may include further description of format or course presentation.]
The course approaches information and communication technologies from critical and historical perspectives. We will investigate theories of the relations among technology, information, ideology, culture, and social structure, as well as methods for studying those relations. We will survey the available theories and methods for understanding large scale technological systems, including the social construction of technology, technological determinism, feminist technology studies, and the political economy of information and communication. We will ask about the motives and tactics of interested actors in institutional and historical context as they promote, sustain, and interpret information and communication systems. We will investigate how information and communication systems mediate, alter, or entrench power relations and cultural practices. While our focus will be on media and information technologies, more theoretical or methodological readings will necessarily cover other systems. Case studies may include investigations of orality, writing, telegraphy, telephony, cinema, broadcasting, and computing (mainframe, desktop, networked, and mobile).

Governance Form C: Guidelines
Effective August 1, 2013

Naming and Identifying Courses: The name of the course must clearly reflect the content and be appropriate to the discipline. A glossary of course codes, definitions of the alphabetical characters and symbols that may be used following a course number are available online. Previously-used course numbers may only be reused after the previous course has been dormant for five or more years. Please consult the SGS Glossary of Course Codes.

Course Format: The SGS Policy and Guidelines on Graduate Courses and Other Academic Activities provides a general definition of a graduate course. This includes possible variations in course weight (e.g. modular, extended and continuous courses), various delivery modes of courses and alternate course types. In particular, “graduate seminars” (generally defined in the policy referred to above) are viewed as distinct from seminar series. Please consult the Graduate Seminar Series Courses: Guidelines.

eLearning: eLearning describes the delivery of online and hybrid courses, and online and hybrid programs using audio, video or computer technologies singly or in combination. The definitions in this Terminology section are drawn from the Ministry of Training Colleges and Universities reporting definitions found in the Multi-Year Accountability Agreement form. Please consult the SGS Guidelines for eLearning in Graduate Academic Programs.

Consultation: Faculty Members interested in developing online courses and programs first will contact their graduate unit chair/director. The chair/director then contacts the Vice-Dean or Associate Dean of Graduate Studies in the Faculty Dean’s Office.

Approvals: References to approval routes align with the University of Toronto Quality Assurance Process (UTQAP).

Contact Hours: See the SGS policy for minimum contact hours required.

Evaluation Components, Percentage Value and Timing: The School of Graduate Studies is governed by the University Assessment and Grading Practices Policy.

Effective Session Date: Proposals are effective no sooner than the beginning of the following session. Retroactive proposals require SGS approval.
**Turnitin.com:** Instructors wishing to use *Turnitin*, or a similar service, must explain this at the outset of the course. Turnitin.com is an electronic resource that assists in the detection and deterrence of plagiarism. Further information is available from the [Centre for Teaching Support & Innovation](https://www.teaching.uwaterloo.ca/).

**OISE Graduate Units:** OISE also requires proposals to include a New Course Proposal Supplementary Form. OISE graduate units should contact the OISE Faculty Graduate Office for further information.

**Medicine Graduate Units:** The Faculty of Medicine requires a detailed course syllabus to be appended to this form (the syllabus will not be posted on the GCT).
